

CT11

Car Top Control Station

An enhanced iteration of our popular car top control station, retaining all the features that make it a market leader along with new functions to make it even more versatile.

Key features and upgrades

- Fabricated with a robust 1.2mm mild steel enclosure
- All panels are easily removed and replaced to provide full access to internal components, wiring and terminals
- Durable powder-coated paint finish in A&A brand colours
- Integral high efficiency LED inspection lamp with 3 hour emergency back-up
- Individually shrouded controls with unique shapes to assist with identification
- Screen printed colour-coded markings for all functions
- QR code printed on front panel with link to installation instructions
- 50mm diameter push-pull stop switch with fail-safe contacts and status indicator flag
- Engineers alarm button fitted as standard
- Optional rear door control for through cars
- 30mA RCD protected double socket outlet
- Built-in shaft-lighting switch
- Segregated mains and control compartments
- Pre-wired version with LSF cable, non-wired version also available
- Additional contacts easily added to suit non- standard applications
- Compliant to EN81-20, BS7277 and BS5655
